

## Morrison High Speed Metering Custom Drive Assembly

**INDUSTRY:** Beverage    **OPERATING SPEED:** 600 CPM    **CONTAINER:** 28 oz Sports Drink

### Customer Container Handling Challenge:

While running at a high speed, these containers need to be spaced to allow adequate room for sleeving.

### Morrison Solution:

This is a repeat system Morrison engineers for our customer. Our screws positively control the sports drinks at a high speeds of 600 CPM, metering them with the correct spacing so the sleeving application can apply the sleeve.

Guarding is provided to protect operators from the screws on these systems.

**Construction:** Stainless Steel High Washdown
