

Morrison Combining Custom Drive Assembly

INDUSTRY: Personal Care **OPERATING SPEED:** 250 CPM **CONTAINER:** 20 oz and 25 oz

Customer Container Handling Challenge:

This customer needed to combine two lanes of containers into one.

Morrison Solution:

This system accepts two lanes of product from backlog and merges them into a single lane. The screws combine each lane and discharge them with a staggered pitch so two lanes can effectively become one.

This system can start and stop based on backlog conditions.

Morrison deluxe adjusters allow for quick set ups between different screw and container sizes. "No Tools" Quick Change allows changeover in a snap.

Construction: Black Anodized Aluminum
