

Morrison Dual Turning Custom Drive Assembly

INDUSTRY: Personal Care

OPERATING SPEED: 160 CPM

CONTAINER: Soap Container

Customer Container Handling Challenge:

Containers needed to be rotated 90 degrees prior to a sleever.

Morrison Solution:

We designed a timing screw drive unit that accepts the full, capped containers that are narrow side leading and turn them 90 degrees so they are wide side leading into a sleever.

This system can be reused with new screws for different container sizes, making it adaptable and practical..

Construction: Black Anodized Aluminum
