

Morrison Indexing + Twisting Custom Drive Assembly

INDUSTRY: Food / Spices **OPERATING SPEED:** 220 CPM **CONTAINER:** Salt + Pepper

Customer Container Handling Challenge:

This food company needed to move containers from a wrapping application while standing up to a laying down position on a lug conveyor.

Morrison Solution:

This system accepts round salt and pepper spice containers from a wrapper while they are standing up, indexes them, and lays the containers down on a lug conveyor via twisting them. Through the index, the proper amount of containers are set up to enter the lug, and the twist inverts them to lay down.

To provide a cost-effective solution, the Morrison equipment is slave driven off the wrapper.

Construction: Black Anodized Aluminum
