

Morrison Divide, Cross Lane, Combine Custom Drive Assembly

INDUSTRY: Household

OPERATING SPEED: 120 CPM

CONTAINER: Wet Wipes

Customer Container Handling Challenge:

One solution was needed to perform dividing, cross laning, and combining.

Morrison Solution:

In this system, Morrison divides, cross lanes, and combines wet wipe containers for packaging. This full solution was designed by Morrison engineers and integrated for the customer.

Each application is a separate assembly, and all of them are build into one complete turnkey solution. For cross laning, photoeyes were integrated into the controls system.

Containers are accepted from a de-palletizer discharge conveyor into this system.

Construction: Stainless Steel
